Other Information
Odd front porch – appears to be a later enclosure. It bows out with six tall one-light casement windows; unclear whether they are fixed.
Two story enclosed addition with two dormers in rear roof.

**Other Information**

Set on a solid foundation, the three-story, six-bay apartment building is designed in the Art Moderne-style. It is concrete block construction with a 6-course American Bond-brick veneer. It is covered by a flat roof that has metal coping. An exterior chimney is located on the south elevation. Now a commercial building, all of the windows have been replaced with paired 2-light metal casements that are capped by a 1-light transom. Belt courses comprised of a single row of header bricks runs at the sill and lintel level of all the windows. The new 2-leaf entry is covered by a new flat-roofed portico that is supported by metal posts.

OTHER INFORMATION

UNUSUAL WINDOWS IN THAT ALL ARE THE SAME SIZE - FAIRLY NARROW, WITH TWO BAYS OF TWO ON SECOND FLOOR AND ONE BAY EACH WITH THREE WINDOWS ON FIRST FLOOR. BRICK STEPS AND STOOP. SARAH FRY SURVEYED THIS HOUSE ON 5/9/05 AND HER NOTES WERE INCORPORATED INTO JANE'S HERE. (BOTH ACCIDENTALLY DID SAME HOUSE.) MER

REVISED: 10/13/2006
Twin dwelling of 3970 Legation Street. The front door and actually the whole house has been built facing the side rather the street, including the front dormer. It would seem that the reason is that it is a very narrow lot. Rear has a third floor Italian Villa-like tower with separate hipped roof. A small roof has been erected over the first floor French doors or floor to ceiling windows facing the street, even though the house is oriented to the side. Sarah Fry completed a survey form on this property on 5/9/05. Could not add this information to the date above that Jane Wattis also surveyed the house. This form represents info from both survey sheets. – Mary Rowse

Other Information:  There are 1.5 stories in the church and 2.5 in the stone administration building. Church staff member Ian Richardson said that the laying of this church’s foundation stone was 1923. The original 1910 chapel, which coexisted with the 1923 chapel, was demolished in 1957-58 at the same time that four houses on Patterson (north side) were demolished. -Mary Rowse

**Outbuilding Notes:**

---

**Other Information**

Front door has pair of 4-light sidelights and 6-light transom over it. Under roof line there are decorative wood brackets in pairs. There is also a decorative brick design under roof line whereby three bricks are laid vertically and three horizontally in alternating fashion across the top edge of the house just below wood molding and decorative brackets.

Other Information

The architect for this house may be Jeremiah J. Crane who did about a half dozen houses in a row along Chevy Chase Parkway (including the one next door at 5818 Chevy Chase Parkway) and at one on Oliver. Crane lived in 5829 Chevy Chase Parkway, the house that sits in between the alley and the large brick house Blessed Sacrament purchased.

CURRENT OWNERS ON MAY 2006 ARE CLAY AND EDNA WELBORN. THEY PURCHASED HOUSE FROM ORIGINAL OWNER’S FAMILY, THE ARCHITECT, JEREMY CRANE. SIDE HALL COLONIAL. SITS UP ON TERRACED HILL.

REVISED: 10/13/2006
5841 Chevy Chase Parkway has 5 bays with one connector bay built in 1950s. The school has a concrete parapet over the main entrance which supports a cross. A granite retaining wall runs along Chevy Chase Parkway. Bay windows are framed with textured concrete blocks. Casement windows on the second story have leaded glass. The building also has an Gable End Interior chimney. The addition was built in 1952 and the Auditorium was built in 1965.

5841 Chevy Chase Parkway built in 1920 - a number of houses were torn down to build the school (this is an anecdotal comment from the surveyor which has not been confirmed by any research at this time).

School has two wings - one marked "Boys" and the other marked "Girls" as they

**Other Information**

This building is already landmarked as a historic structure. Building was featured in "Best Address." Noted as one of the earliest suburban Washington apartment houses. Also noted as one of the first uses of structural concrete construction. Roof features overhanging eaves and exposed rafters. Canted bays of triple franch doors flank either side of the main entrance on the second, third, and fourth story. An elaborate iron fireescape is located on either side at the second, third, and fourth story. Elaborate Baroque entablature over the main entry.

**Other Information**

Set on a solid foundation the one-and-one-half-story, seven-bay commercial building is designed in the Colonial Revival style. It is 5-course American bond brick construction with a brick waternetable that has a torus profile. It is covered by a hipped roof clad with slate shingles and has a roof ballustrade. The overhanging eaves have wood modillions. Six gable dormers are located on the façade and three gable dormers are located on each side elevation. The dormers are clad with wood siding and have 6/6 double-hung wood sash windows. The slightly projecting front gable bay has a round window and wood dentils. The double-leaf entrance is located within the projecting bay and is capped by a 1-light transom. The 12/12 double-hung wood sash windows.

### Other Information

Built by Harry Wardman. Decorative pairs of wood brackets under roof. Original front door, sidelights and three-light transom. Rear sleeping porches look original. Front walkway and stairs seem to be original concrete. Third floor dormers on front and south-facing end have two pairs of casement single-pane windows. Rear (east) facing dormer has 1 pair of casement single-pane windows. Front and side dormers are trimmed with fluted pilasters. (This is a corner house so right side is highly visible.) House is wider than neighboring houses. Front picture window is actually a pocket window and has a 4-brick high arch over it. Front, second-story bay window is narrower than the one next to it at 5303 Connecticut Avenue. Each window of

### Notes:
- Porch enclosed by current

### Other Information:

BUILT BY HARRY WARDMAN. Porch enclosed with brick (stretcher bond). Windows are new, floor to ceiling, possibly casement, although metal likely. Double front door is new. Enclosed in 1950 per owner. New cement front walkway with brick edging on stairs. Second story has only one window, a bay window with double hung 1/1 windows. Each window of bay is flanked by a single pilaster with Ionic-type capital with metal-slat awnings outside. Strong overhanging roof eves supported by pairs of brackets-two on south end and the pair on the north side shared with attached house. Dormers: Front dormer is comprised of three wood windows: a pair of two casement single-light windows and an oval with spokes. Oval window is flanked by fluted pilasters.

Windows are new, floor to ceiling, possibly casement, although metal likely. Double front door is new. Enclosed in 1950 per owner. New cement front walkway with brick edging on stairs. Second story has only one window, a bay window with double hung 1/1 windows. Each window of bay is flanked by a single pilaster with Ionic-type capital with metal-slat awnings outside. Strong overhanging roof eves supported by pairs of brackets-two on south end and the pair on the north side shared with attached house. Dormers: Front dormer is comprised of three wood windows: a pair of two casement single-light windows and an oval with spokes. Oval window is flanked by fluted pilasters.

Woolen garage door may be original. Appears to open by accordion action.

**Other Information**

Built by Harry Wardman. Front porch has been enclosed. A new square single-pane window with metal or vinyl strips to simulate mullions and a new single door have been installed. Flagstone has been laid over front walk and edging. Original concrete curbing remains. Northern end and rear have been wrapped in a three-story addition that has an enlarged north-facing dormer. Original rear dormer has been swallowed. Interior of house has been divided up into six units per neighbor. Neighbor says work was done in 1980. Addition has its own raised porch and entrance. Deck on roof of addition. Rear has a ground floor entrance and tiny deck. Windows on original part of north end are replacement double-hung, 1/1 vinyl. Dormers: Front dormer is comprised of

Other Information

Set on a solid foundation, the two-story, six-bay commercial building is concrete block construction clad with long and narrow stretcher-bond veneer. The six bays divide the building into six stores with recessed entries and awnings over the doors. The entries have large, fixed 1-light metal windows. A one-story concrete block section of the building extends off the rear of the commercial building listed as 5501 Connecticut Avenue.

Revised: 10/13/2006
SET ON A SOLID FOUNDATION, THE TWO-STORY COMMERCIAL BUILDING IS MASONRY CONSTRUCTION CLAD WITH STONE VENEER ON THE FIRST STORY AND 5-COURSE AMERICAN-BOND BRICK ON THE SECOND STORY. IT IS COVERED BY A FLAT ROOF WITH A PARAPET. THE PARAPET HAS A PROJECTING CORNER BAY ON THE SOUTHWEST CORNER. THE PARAPET OF THE BAY IS CONSTRUCTED OF STONE AND HAS A STONE BATTLEMENT AND DENTICULATED CORNICE. A PENT ROOF COVERED WITH SPANISH TILES FLANKS THE CORNER BAY ON THE EAST AND SIDE ELEVATIONS. THIS SECTION OF THE BUILDING BELONGS TO STARBUCKS. THE FIRST STORY HAS METAL 1-LIGHT FIXED STOREFRONT WINDOWS AND THE SECOND STORY HAS 1/1 DOUBLE-HUNG METAL WINDOWS WITH CONCRETE SILLS. THE NORTHERN TWO BAYS OF THIS SECTION, LISTED AS 5502 CONNECTICUT AVENUE NW, IS THE FULL OF

SET ON A SOLID FOUNDATION, THE TWO-STORY, THREE-BAY COMMERCIAL BUILDING IS AMERICAN BOND CONSTRUCTION CLAD WITH STUCCO. IT IS COVERED BY A FLAT ROOF THAT HAS A PARAPET WITH METAL COPING. THE FIXED STOREFRONT WINDOWS FORM A RECESS CANT ENTRANCE THAT IS COVERED BY A TIN MANSDAR ROOF.

**Revised:** 10/13/2006
SET ON A SOLID FOUNDATION, THE TWO-STORY, THREE-BAY COMMERCIAL BUILDING IS STRETCHER-BOND BRICK CONSTRUCTION. IT IS COVERED BY A FLAT ROOF WITH A PARAPET THAT HAS A COLONIAL REVIVAL-STYLE CORNICE WITH A CAVETTO PROFILE AND DENTILS. BELOW THE CORNICE ARE THREE BLIND SQUARE PANELS. THE FIRST STORY HAS TWO ENTRANCES AND A CENTRAL PROJECTING SQUARE BAY WINDOW WITH ROWLOCK SILL. THE CENTER BAY OF THE SECOND STORY HAS A 2-LIGHT PROJECTING WINDOW FLANKED BY 6/6 DOUBLE-HUNG WOOD SASH WINDOWS. THE SASH WINDOWS HAVE CONCRETE SILLS AND SOLIDER COURSE LINTELS.
Set on a granite stone foundation, the two-story, five-bay commercial building is constructed of cut granite blocks. It is covered by a flat roof with metal coping. The central entrance of the façade has an arched entry with a Classical Revival-style surround. The fluted pilasters support a cornice with an ogee profile and denticulated frieze. The bays of the building are separated by Doric pilasters and the frieze has triglyphs, circular panels, and the words "Chevy Chase Arcade." The windows are trippled fixed metal storefront windows with 1-light transoms. The rear elevation is constructed of 5-course American-bond brick and has glass block windows and double-hung replacement windows.

Set on a solid foundation, the two-story, three-bay bank is masonry construction with a stone veneer. It is covered by a flat roof that has a box cornice supported by modillions. The plain frieze has the words "The Riggs National Bank" applied in metal. The façade has an arched entry with flared arched lintels. The casement windows have stone lintels. The pilasters are composed of horizontal bands of stone and have a granite base. The side elevation has 8/8 double-hung wood windows with sidelights and a fanlight. Ornamentation includes an entablature with the Riggs Bank logo and a relief panel with a portrait of Pierre L'enfant.

### Other Information

The commercial building located on square 1859, lot 0054 has been split into two distinct storefronts. Set on a solid foundation, the one-story, three-bay building located on the southern half of the property is 5-course American-bond brick construction. It is covered by a flat roof with metal coping. The façade has been clad with enamel panels that are sheathed with stucco and has fixed metal 1-light windows. The rear elevation has arched lintels over wood windows and the clerestory windows have been in-filled with brick. The northern half of the lot is occupied by a one-story, three-bay commercial building constructed of 7-course American-bond brick. It is covered by a flat roof. The façade has been clad with slate shingles on the upper half to

Other Information

Set on a solid foundation, the one-story commercial building is designed in the Modern Colonial Revival-style. It is constructed of Flemish bond brick and has brick quoins. It is covered by a flat roof with a concrete cornice that has an ogee profile. A columnade is located on the side elevation and the standing-seam metal roof is supported by Tuscan columns. The 21-light metal replacement windows have stuccoed wood panels below the sill.

Revised: 10/13/2006
SET ON A SOLID FOUNDATION, THE ONE-STORY COMMERCIAL BUILDING IS STRETCHER-BOND BRICK CONSTRUCTION CLAD WITH STUCCO. IT IS COVERED BY A FLAT ROOF THAT HAS A STONE CORNICE WITH AN Ogee PROFILE AND DENTILS. THE NEW FAÇADE WITH STUCCO AND METAL STOREFRONT WINDOWS COVERS THE ORIGINAL BUILDING; ALTHOUGH, THE LAYERS CAN BE SEEN FROM THE REAR. THE WINDOWS WITH ARCHED LINTELS HAVE BEEN IN FILLED WITH BRICK ALONG THE REAR ELEVATION.
Set on a solid foundation clad with brick, the two-story, eight-bay commercial building is designed in the Commercial-style. There are three storefronts. It is covered by a flat roof with a parapet that has blind square panels and metal coping. Below the parapet is a heavy wood cornice with an ogee profile and has a denticulated frieze. A belt course with an ogee profile articulates the first and second story. The main entry is located within the canted corner and has double-leaf doors. The first story has fixed metal one-light windows with rowlock sills and the second story has 1/1 double-hung metal windows with concrete sills.
The Community Center is located on the northeast corner of Connecticut Avenue and McKinley Street. Set on poured concrete foundations, the two-sty buildings are designed in the Modern-style. The Community Center is covered by a flat roof and has vertical concrete columns that project from the building. A large concrete bulkhead with metal coping overhangs these columns. Windows consist of fixed metal ribbon windows and 1/1 double-hung metal sash windows. The Community Center is comprised of two-story connected buildings with a sunken interior courtyard at the junction. A large concrete bulkhead with metal coping overhangs these columns and projecting concrete belt course separates the first and second stories. Windows consist of the...

REVISED: 10/13/2006
Set on a solid foundation, the one-story, nine-bay Colonial Revival-style commercial building is Flemish-bond construction with a brick water table and brick quions. It is covered by a side gable roof clad with slate shingles and has a wood cornice and modillions with returns. The entrance, capped by a fanlight, is covered by a front portico supported by Ionic columns. The 8/12 double-hung wood sash windows have jack-arched lintels and rounded brick sills. The pedimented gabled dormers are clad with wood siding and have 6/6 double-hung wood sash windows.
Set on a solid foundation, the one-story three-bay bus terminal is designed in the Colonial Revival style. It is 5-course American bond brick construction with brick quoins. It is covered by a hipped roof clad with slate shingles and has a metal lantern at the apex as well as a corbelled brick cornice. The double-leaf recessed entrance is covered by a hipped-roof portico supported by metal posts. The entrance is flanked by 1/1 fixed wood windows with rowlock sills. Round 9-light wood windows are located above the 1/1 wood windows and have a rowlock surround. A metal awning supported by arched posts is attached to the side elevation and wraps around to the rear elevation. The brick underneath the awnings is enameled.

**Other Information**

Last of six large townhouses in a row built by Harry Wardman. East end of row. Front door flanked by pair of 12-light side lights. Topped by tripartite 10-light transom. Triangular pediment over entrance supported by pair of scrolled brackets. Roof of pediment probably has mostly original terra cotta tiles with some replacements (material undetermined). Main roof retains decorative pierced terra cotta tiles along roof line; dormer roofs do not. Front yard curbing (retaining), stairs, frontwalk and porch all appear to be original concrete. Original iron balustrade is on front porch with decorative elements. Double sleeping porch at rear has retained many original elements, but lower porch has been altered to include a strongly projecting...

Other Information:  One of six large townhouses in a row built by Harry Wardman. Front door flanked by pair of 12-light side lights. Topped by tripartite 10-light transom, miniature ballustrade-form entablature over entrance supported by pair of square brackets. Dormer roof lines retain pierced terra cotta tiles along peak. Front yard curbing appears to the original. Front walk, border, stairs and porch have new flagstone. Original iron ballustrade on front porch with decorative elements. Double sleeping porch at rear appears to have retained original windows (under storms); six windows acorss back of upper story, double hung, 6/6, two windows on each side wall. Lower porch has three double hung 9/9 windows, one narrow double hung 6/6 next to back door. Revised: 10/13/2006

Notes:  Backyard retaining wall of concrete slabs or blocks has been retained.

Other Information

One of six large townhouses in a row built by Harry Wardman. Iron balustrade on front porch is not original. Double hung sleeping porch windows appear to be replacements—possibly vinyl. Vertical wood siding retained on upper rear porch; lower porch finished in stucco-like material. Front porch and front walk re clad in gray slate tiles. Concrete retaining wall retained. Triangular pediment above front entrance projects as roof. Clad in new composite or asphalt shingles. Supported by pair of scrolled brackets.

One of six large townhouses in a row built by Harry Wardman. This is the third house from the west end. The front door is flanked by a pair of 12-light side lights. Topped by a tripartite 10-light transom. Miniature balustrade-like entablature over entrance supported by pair of scrolled brackets. Dormer roof lines retain terra cotta lacey tiles at peak, but main roof and dormer walls and roofs have been redone in asphalt "fishtail" shingle. Front porch and front wall and retaining wall redone in bluestone or slate. Front porch balustrade replaced with new iron. Decorative elements from original balustrade incorporated. Double sleeping porch at rear is essentially wood construction largely unmodified on the exterior, except eastern side of the

Other Information:  
One of six large townhouses in a row built by Harry Wardman. Dormer roof lines are trimmed with pierced (lacey) terra cotta tiles. Part of series of six row houses; this is second from west end. Front door flanked by pair of 12-light side lights with tripartite transom of 10 lights. Triangular pediment over entrance supported by scrolled brackets. Concrete front walk may not be original. A vertical projection from roofline in front of chimney, made of brick, appears to be a second chimney but is decorative. Original wrought iron balustrade with decorative elements on front porch. Backyard retaining walls of concrete block.

**Outbuilding Driveway:** No

**Notes:** Pool House

**Other Information**

Multiple-windowed bay w/ standing-seam metal roof is kitchen addition. Pool house is a large single story wood shed with a standing seam metal roof, two sets of double doors revealing pipes inside and space for chairs. If you're facing the house the pool house is located on the right side of the property near the front, inside a fenced yard.

Notes:

Outbuilding Driveway: No

Other Information

Built by Harry Wardman. Front porch first floor "picture window" which looks fixed but is actually a pocket window that slides up into the wall. This is true for all of the similarly designed Wardman houses on this block. Two porch columns or capitals have been replaced. Transom over front door appears to be stained glass and not original. Top floor oval window is gone. Original concrete walkway, sidelights, transom over first floor window, decorative brickwork over transom, porch rails, tin framing around second story bay window, brackets under eaves.

REVISED: 10/13/2006
In 2004, expanded kitchen in rear and added bath on second floor. Amazing woodwork on portico with two columns. Porch has four columns with pergola-like extensions. Two front doors, l) has 21-light panel door on left side, nine-light panel door on right side. Original gas light fixtures inside of house (per owner). Beautiful stucco home—very interesting woodwork.

OTHER INFORMATION

Front door is probably original. Four-light panels on top. Beautiful wrap-around porch with five columns.

REVISED: 10/13/2006
Set on a solid foundation, the one-story, eight-bay commercial building is designed in the Classical Revival style. It is covered by a flat roof with a parapet. The building is divided into four stories each with a two-bay façade. The entrance is located in the left bay and projecting storefront windows are located in the right bay. The entrance and storefront windows are capped with five, fixed 1-light wood windows. The stone façade has Classical Revival-style details including fluted pilasters with Tuscan capitals, an ogee cornice with modillions, and a paneled entablature. Circular panels are located within the frieze.

Other Information
House has two pairs of 16-light French doors on right side of house. A garage is built into the rear of the house, but is no longer used as a garage. The one-bay brick structure is accessed by a driveway off of McKinley Street.

Revised: 10/13/2006
HOUSE HAS A TWIN NEXT DOOR (3722 MCKINLEY) WHICH WAS ALSO BUILT SO THE SIDE PORCH FACED THE STREET AND THE FRONT DOOR FACED WEST. IN THE CASE OF 3720, OWNERS KEPT SIDE DOOR AS FRONT DOOR. IN THE CASE OF 3722, THE SIDE PORCH BECAME THE FRONT PORCH AND A FRONT DOOR WAS INSTALLED. THESE TWO HOUSES MAY BE "PLAN BOOK" HOUSES SINCE GEORGE REPP WAS AN ARCHITECT WHO DREW PLAN BOOK HOUSES.
This house and the one next door at 3720 were turned on their side to put them into these side lots in 1922. This house's front door has been reoriented back to the street so the number of bays reflects the openings on the street side of the house. Architect George W. Repp designed "plan book" houses and this (and its twin at 3720 McKinley) could be one, where the plans were purchased from a catalogue.

**Number of Bays:** 2

**Property Status:** Contributing  
**National Register:** No  
**Date:**

## Building Form:
**Freestanding House**

## Building Name:

## Building Structure:
**Wood Frame**

## Primary Building Material:
**Weatherboard Siding**

## Secondary Building Material:
**Stucco**

## Building Material Comments:
**Pebble dash stucco.**

## Foundation Type:
**Masonry Wall**

## Foundation Material:
**Uncut Stone**

## Foundation Notes:
**Granite Foundation**

## Roof Type:
**Cross Gable**

## Roof Material:
**Asphalt Shingle**

## Roof Notes:

## Type of Windows:
**Double-Hung**

## Window Material:
**Not Visible**

## Window Notes:
**Double hung windows are 8/1**

## Type of Dormers:
**Gabled**

## Dormer Material:
**Not Visible**

## Dormer Material Notes:
**No front dormer, only two on left**

## Type of Chimney:
**Interior**

## Chimney Material:
**Brick**

## Chimney Notes:

## Porch:
**Yes**

## Portico:
**No**

## Driveway:
**No**

## Outbuildings:

## Porch Type:

## Number of Stories:
1

## Number of Bays:
2

## Location:
Front

## Material:
Wood

## Notes:
Porch stretches across on front door appears to be original and has 12 lights. Architect’s name is listed as C.P. Ryerson. I’ve wondering if it shouldn’t be listed as Ernest Dright Ryerson (E. D. Ryerson), who designed a number of houses in this subdivision and elsewhere in the city. Never heard of C.P. Ryerson. – Mary Rowse

## Outbuilding Driveway:
**No**

## Notes:
**Granite exterior to garage.**

Number of Stories: 1

Number of Bays: 1

Location: Rear

Material: Wood

Outbuilding Driveway: No

Notes: Exterior finish is pebble dash stucco.

Note: This significantly alters the appearance of the house.

Other Information:

Front door is half glass with two three-light sidelights and a three-light transom over door. Arts & Crafts window with diamond panes to left of front door. House has had major work done to front basement area. A metal roof protrudes below first floor porch floor to act as a roof for basement changes. The basement was dug out and ceiling was heightened. This significantly alters the appearance of the house.

**Other Information:**

Two side additions, one story, but appear original. East side has 4 casement windows in one bay with 8 lights each; left addition is screened porch. Both are stucco with Spanish tile roofs.

Driveway meets house with decorative iron gate between two stone columns topped with urns (matching urns on house entry).

Enormous two-story addition juts out side with scrolled decorative elements at roof, which match those at original side additions.

Architecture seems unique to Chevy Chase.

Decorative chimney with open "windows" topped with Spanish tile "roof".

**Other Information:**
Paneled solid wood front door is flanked by a pair of four-light sidelights. This house and 3706 were both on the same building permit and had the same floor plan at one time. This house has a recent addition on the side and the front porch was enclosed on the right side about 60 years ago. Sidewalk coping along sidewalk stretches from 3708 to 3702 (four houses). Original coping was replaced about three years ago.

Other Information

Original front door has four lights in upper half. There’s a top and a bottom half to this door which can be opened separately. First floor plan seems identical to 3704 Morrison, which was also built by Brashears, but three years later. New flagstone walkway and steps from sidewalk to porch.

### Other Information

This is really two houses. The first is a bungalow designed in 1909 with extensive leaded glass and bay windows throughout. The original house is connected to a two-story addition in the rear designed by Robert Bell. The roof on the addition is a hipped roof. There are four bays in the front of this addition. There is also a chimney. Front door on bungalow is original with six lights in the top one-third of the door. The screen door is also original.

**Other Information**  
Forch roof may have had a wood railing around it at one time, since there are square wood columns next to house. Owner says that when garage was originally built, there was no cement under walls of garage so insurance company wouldn’t insure the structure because of concern about termites getting easier access to walls. Owner has since poured concrete to create a floor, but since the concrete never went under walls, the insurance company wouldn’t insure it. Owner has original house plans from the archives. (Mary Rowse)

Other Information: 8/8 windows all new. Porches added on side. Back has large addition. The side of the house has an enclosed porch with interesting semi-circular window. This house was nearly destroyed in a fire, and thus the original style is not discernable. The present owner was the fireman who saved it, he purchased it and renovated it, added rear addition, he could be consulted for the history. Main roof has two skylights facing street.

OTHER INFORMATION

HOUSE HAS TWO CURVILINEAR GABLES ON EITHER FRONT END. THERE ARE A NUMBER OF FRENCH DOORS, WOODEN WINDOW BOXES AND DECORATIVE WOOD BRACKETS. THERE IS A SINGLE STORY ADDITION ON THE LEFT WHICH IS SET BACK FROM THE MAIN HOUSE. THIS APPEARS TO BE THE KITCHEN. AN ROUND, OBSERVATORY-LIKE TOWER HAS BEEN BUILT IN THE CENTER REAR OF THE ROOF. IT HAS WINDOWS AND DOORS AND MAY OPEN FROM THE TOP. THERE IS A RETAINING WALL MADE FROM CINDERBLOCKS AND FINISHED WITH SMOOTH STUCCO THAT’S NEXT TO THE SIDEWALK. A FLAGSTONE WALKWAY LEADS TO THE FRONT DOOR AREA WHICH IS LIKE A PATIO.

Other Information:
House is very difficult to see because it is shrouded in vines and overgrown
trees and bushes. Owner loaned original house drawings to Chevy Chase
Historical Society, which made copies of them. The Society tried for years to
return the plans, but the owner was never at home. Not sure if the Society
(based at Chevy Chase Library in Chevy Chase, MD) still has them or whether
they were turned to the owner, Mrs. Zino Musgrove, who is very friendly.
Front door of house is two-thirds glass. It may have 15 lights. Pair of 10-light
sidelights on either side of the door. Concrete steps. No retaining wall.

**Other Information**

Front door has 15 lights with two five-light sidelights on either side. There are two second-story bay windows facing front, side by side. This house design is similar to about five or six on this block and on the 3700 block of Oliver Street. The only thing different in the houses is the third-story dormer. There was a major fire in this house about 15 years ago. The whole house was gutted inside I believe. I think the windows were replaced then.

**Other Information**

Draftsman Ernest Dwight Ryerson lived here. He designed a number of houses in Chevy Chase DC. House has an addition attached to rear. Was more of a bungalow at one time. Interesting that house was oriented toward Connecticut Avenue rather than to Northampton Street. Side porch has been enclosed. Front door faces west and is half-glass with six lights. The door is flanked by a pair of three-light sidelights on each side. Projected (enclosed) entryway is probably original. Brick retining walls and walkways.

Number of Bays: 
Location: 
Material: 
Outbuilding Driveway: No
Notes:

Original exterior house design is identical to another Jeremiah Crane house at 5812 Chevy Chase Parkway, NW. Windows are slightly different, although the theme of diamond shaped panes is consistent between two. Oliver Street house has an additional window design—a center square turned on it’s corner to be a diagonal-shaped pane with spokes coming off of it. Second floor front windows have an overhang above them that has exposed wood rafters.

Other Information

Original 18th century (c. 1725) Joseph Belt Manor house was demolished in 1907 to make way for this home built the same year. In the book "Footsteps", it says that the 1907 purchaser of the property, Brainard W. Parker, took the bricks from the walls of the all-brick Belt home and used them to build the foundation and both chimneys of the new home. Brickers were said to be from England. Small one-story addition off to right of house. Has a half-timbered look with the combination of wood beams and .

**Material:** Wood

**Notes:**

- Parking pad for two cars in rear.

**Other Information**

Octagonal library addition to left of house. Casement windows (3/3 twice) are facing street from front of house on first floor. These windows match the outer front door, which is perpendicular to these casement windows and which leads to a vestibule with a double door which is half-glass. Flagstone walkway from sidewalk to porch. Beautiful old granite retaining wall is next to sidewalk.

Other Information
Ft. Cochere on side of house, also with a side entry with steps leading from front and back of home.
Stone lintels over windows. Brackets under eaves. 10-pane fanlight and side lights on front door. Solid round columns for porches.
Brick wall at sidewalk. House sets above street. Two story rear porch with 3 bays runs 3/4 width of house.
This is a triple lot.

Revised: 10/13/2006
There are at least four sets of double wood doors in the Gothic Arch design. There is an enclosed portico on the rear, facing the playground and parking lot, but the door is flush with the end of the portico. The roof features two turrets with slate roofs and elaborate iron finials and 3 dormers on the Quesada side and 4 dormers on the rear facing the playground. There is a steeple with a cross above the bell tower.
